CITATION 01_75_17C_006_4500058_21 FOR WATER QUALITY FAILURE – BURNEY FALLS TRAILER PARK PUBLIC WATER SYSTEM, NO. 4500058

This letter is to inform you that the Burney Falls Trailer Park Water System failed to meet bacteriological domestic water quality standards for Second Quarter 2017. The number of positive bacteriological samples exceeds the limits of Title 22, California Code of Regulations (CCR), Article 3, and Section 64426.1(b). Six of ten water samples collected between May 30 and June 6, 2017, were positive for total coliform bacteria and two of these ten samples tested positive for E. coli. The standard is that no more than one sample per quarter may do so.

Tier 1 public notification (Boil Water Notice) was distributed within 24 hours of the E. coli MCL exceedance and a Level II Site Assessment was conducted by Shasta County Environmental Health Division (SCEHD) staff on June 21, 2017, as required due to the E. coli MCL. During the Level II Site Assessment, several items were noted that could have led to the increase in bacteria count. These include:

1. The system pressure had dropped to less than 5 psi,
2. Samples had not been collected properly,
3. Anti-siphon devices were missing throughout the facility.

Section 64464.1, Title 22, CCR, specifies that the SCEHD shall direct the water supplier to provide public notification. For the Second Quarter 2017 water quality failure, the water system shall give notice by posting a notification in conspicuous locations throughout the area served by the water system and by one or more of the following methods to reach persons not likely to be reached by the previous method: publication in local newspaper, email message to customers (employees and students), posting in the internet or by direct delivery to each customer. The enclosed notice titled "Important Information about Your Drinking Water" is the public notice that you shall give to all water users and post to fulfill the above notification requirements.

Within 45 days of receipt of this letter, you are required to send this office a signed statement which indicates the date the notice was posted. Completing and returning the enclosed

"Certification of Completion of Public Notification" form fulfills this requirement. Please also include what corrective action was taken to prevent such failures in the future and the cause of the failure if known.

Note that Section 116577 of the California Safe Drinking Water Act provides for the SCEHD to be reimbursed by the public water system for costs incurred for preparing and issuing public notifications to that system. In accordance with Section 116577, the water system will be billed for the preparation and issuance of this letter and notification. Approximately 1/2-hour was spent preparing this letter and notification, and currently our costs are approximately \$66.58 per hour. You shall submit a check in the amount of \$33.29 to SCEHD.

Please call me at 530/225-5787, Monday through Friday between 8:00 and 8:30 a.m., should you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script, appearing to read "Christy Gilbreath".
